

2022 Performance Annual Report

1. General Information

Facility/System Name: Waste Water Treatment Plant

Responsible Entity: Samuel C. Lilley

Person in Charge/Contact: Samuel C. Lilley

Description of Collection System or Treatment Process:

Town of Jamesville Wastewater is gravity flowed to one pumping station. From that station it is pumped through a forced main to the WWTP (waste water treatment plant), at this time the treatment process takes over. A 0.15 MGD secondary WWTP with a bar screen, continuous flow measurement, dual aeration basins, dual clarifiers, aerobic digester and sludge drying beds.

II. Performance

Text Summary of System Performance for Calendar Year

Inspection - showed that the waste water treatment plant is well operated and maintained. There were no deficiencies found or any discrepancies found in reporting or record keeping.

List (by month) any violations of permit conditions or other environmental regulations. Monthly lists should include discussion of any environmental impacts and corrective measures taken to address violations.

No violations at the waste water plant for 2022. Wastewater Treatment Plant was in compliance with NPDES Permit.

III. Notification

State how this report has been made available to users or customer of the system and how those users have been notified of its availability.

Notification has been put on the February 2023 Water/Sewer bill that the report is available at the Jamesville Town Hall. A copy of the report will be put on the Town of Jamesville's website.

IV. Certification

I certify under penalty of law that this report is complete and accurate to the best of my knowledge. I further certify that this report has been made available to the users or customers of the named system and that those users have been notified of its availability.
